

RAJIV GANDHI R

ASSOCIATE TECHNICAL MANAGER

+91 9944819994 rajiv23foryou@gmail.com

#101,flat F4 1st Floor, Ruby Manor Apartments, Ganesh Nagar, Selayur, Chennai – 600073.

SKILLS

TECHNICAL

- C#.NET, ASP.NET, VB.NET
- MVC, .NET CORE, WEB API
- HTML, Java Script
- AngularJS, JQuery, AJAX,
- WCF, Angular13
- Oracle12, SQL Server, MySQL
- PostgreSQL, MongoDB (Basic)
- LINQ, Redis Cache
- AWS Elastic Search & File share
- Azure AD, B2B & B2C
- Azure APIM
- Azure Func App
- Azure Identity Management
- Azure Logic Apps
- AzureBlob Storage
- Azure Log Analytics
- Azure Service Bus
- Azure Monitoring Tools
- Azure Integration Account
- Azure SQL Server
- Azure App Insights
- Diagnostics & Alerts
- CI/CD Pipeline
- LLM/GPT
- Vertex AI

DOMAIN

- Banking & Financial domain
- Telecom domain
- Healthcare domain
- Semiconductor domain

MANAGEMENT

- Project & Program Management
- Scrum Master
- Team Management
- Risk, Change& Resource Management

CERTIFICATION

- Microsoft Azure Fundamentals
- Microsoft Azure Developer
- Microsoft Azure Administrator
- Microsoft Azure DevOps
- Agile Project Management
- Agile Scrum Foundation

PROFESSIONAL SUMMARY

- Seasoned Project Technical Lead/Architect with over 15+ years of comprehensive experience in Web Technologies, Web APIs, and Cloud Platforms (Azure & AWS).
- Worked across multiple domains including Telecom, Banking & Financial Services, Semi conductor and SaaS-based products, gaining deep understanding of industry- specific processes, compliance standards, and technology needs.
- Recognized for a consistent track record of designing and delivering scalable, secure, and high-performing enterprise architectures, leveraging industry best practices and design patterns.
- Proficient in leading end-to-end system design and implementation, including data migration initiatives and Blue-Green deployment strategies.
- Angular & Azure Integration Specialist with expertise in designing and implementing end-to-end cloud solutions using Azure services.
- Experienced in integrating enterprise, SaaS, and on-premise systems via Logic Apps, Functions, API Management, Service Bus, and Event Grid.
- Experienced in leading cross-functional teams of developers and QA professionals, overseeing staffing, mentorship, and performance management to ensure engineering excellence and product delivery at scale.
- Deeply knowledgeable in the entire Software Development Life Cycle (SDLC) and experienced in Agile frameworks such as Scrum (functioning as both Scrum Master and Product Owner), Kanban, and traditional Waterfall methodologies.
- Demonstrated success in project and program management, IT strategy execution, and organization-wide digital transformation initiatives, driving operational efficiency and measurable business value through technology.
- Exceptional in stakeholder and client engagement, technical leadership, and risk and budget management, consistently delivering projects on schedule, within scope, and aligned to quality and business objectives.
- Hands-on experience to AI tools and technologies used in automating workflows, enhancing analytics, and improving decision-making.
- Exposure to integrating AI-driven APIs, chatbots, and cognitive services into enterprise applications using platforms like Azure Cognitive Services, OpenAI tools.

WORK EXPERIENCE

Accenture Solutions private limited

MAR 2015 - JUL 2025

Packaged Development Associate Manager (Technical Architect\Lead)

- I am responsible for designing and overseeing the implementation of high-level IT systems and infrastructure. They bridge the gap between business goals and technical solutions by defining system architecture, selecting appropriate technologies, and ensuring scalability, security, and maintainability.
- Collaborated with functional architects and development teams to design and deliver end-to-end solutions.Enforced enterprise architecture standards, policies, procedures within application development projects.
- Provided architecture expertise during proposal reviews to access feasibility & technical viability.
- Leading multiple teams of Developers and Quality Analysts, including staffing, mentoring, managing performance and maintaining a best-of-class engineering team.

ASAP Info Systems (Current Name: Team Lease)

NOV 2014 - MAR 2015

Senior software developer

Worked as a Full Stack Developer on enterprise-level telecom solutions for the Singtel client, contributing to both frontend and backend development in an agile environment.

Avon Global Solutions private limited

Software developer

JUL 2010 - OCT 2013

Began my IT career by developing software applications for clients such as Citibank and Taurus Quest, gaining hands-on experience in full software development lifecycle (SDLC) processes.

SOFTWARE TOOLS

- Service Now
- GIT,
- GITHUB Co-Pilot
- Azure Devops
- HP Qualitycenter
- Visual Studio
- Visual Code
- Azure Portal
- GenAI/ChatGPT
- Microsoft AI
- Microsoft PowerApps
- Splunk
- Sonar Qube
- Telerik
- Bootstrap
- HirePro
- HireVue
- Microsoft App Dynamics
- JIRA
- Azure Devops
- SVN
- Putty
- Bruno, Postman

ACHIEVEMENTS

- Star performer of the year
- Trendsetter Award
- Stellar Award
- Apex Award
- ACE Award
- Executive Award
- Circular Award
- Automation Award

LANGUAGES

- English
- Tamil
- Telugu(Basic)
- Hindi(Basic)

PROJECTS

Accenture Solutions Private Limited

LAM Research Client - Azure Integrations

Technologies - C#.Net, WebApi, Microsoft Azure Iaas & Paas, Azure DevOps.

Designation: Packaged Application Associate Manager

Azure Integration enables seamless connectivity between source and target systems using cloud-native services such as Azure Fun Apps, Azure Service Bus, and API Management. It facilitates secure, scalable, and real-time data exchange, supports hybrid and cloud-native scenarios, and ensures data consistency across diverse platforms—on-premises or in the cloud. This integration architecture enables automation, transformation, and orchestration of business processes between disparate systems.

Roles & Responsibilities

- Designed scalable, cloud-native integration architectures using Azure services (Azure Functions, APIM, Service Bus, Event Grid).
- Defined hybrid and microservices-based integration patterns.
- Collaborated with functional architects and development teams to design and deliver end-to-end solutions.
- Enforced enterprise architecture standards, policies, procedures within application development projects.
- Implemented API security with OAuth2 and Azure AD; enforced encryption, and secure key management via Azure Key Vault.
- Designed robust data flows with transformation, error handling, and consistency strategies including idempotency and message deduplication.
- Ensured high availability and disaster recovery; optimized performance and cost using Azure Monitor, Application Insights, and Log Analytics.
- Worked with devops team to understand the CI/CD automation via Azure DevOps for infrastructure and integration components, including testing, linting, and Pipeline deployments.
- Partnered with cross-functional teams, led design/code reviews, and provided mentorship and technical guidance
- Produced detailed architecture and API documentation, ensuring alignment with governance and compliance requirements.
- Functioned as the Technical Architect representing the Accenture offshore team, working in close collaboration with multiple business and technical workstreams including I2R, MES, CQ, Teamcenter, iPLM, and PLM.
- Acted as the primary point of contact (POC) for MES and CQ Azure Integration RICEFWs, ensuring end-to-end ownership, coordination, and timely delivery.
- Led and facilitated Daily standup & weekly integration status calls, providing timely updates on Technical Design (TD) and BTUT progress to stakeholders and project leadership.
- Proactively tracked and updated JIRA tickets on a daily basis, shared progress reports with senior management, and promptly escalated risks or blockers to ensure resolution.
- Prepared and reviewed Technical Design Documents (TDDs) in alignment with solution architecture standards, collaborating with onshore technical architects and LAM code review teams for validation and approval.
- Worked in development RICEFWs Integration between Siemens Opscenter and Complaine Quest
- Complaine Quest to Teamcenter and also worked in Team center to iPLM vice versa RICEFWs.
- Created the unit test cases for all RICEFWs and provided the support for Vulnerability issue.
- Conducted code walkthroughs and technical sessions to support code reviews, design clarity, and alignment with best practices.
- Addressed and resolved all open technical queries related to RICEFWs across workstreams, maintaining clear communication and coordination between offshore and onshore teams.
- Worked in WebApi and created more LINQ queries.
- Maintained ownership of various project documentation and governance trackers, including:
 - RICEFWs Master Tracker
 - Cross-Workstream Query Log
 - Training & Technical Certification Records
 - New Joiner Access & Onboarding Tracker
 - Weekly Leadership Status Reports
 - Software Prerequisite Tracker
 - Deployment Tracker
 - Leadership Presentation Slides
 - Integration Design Pattern document
 - Integration API List

PERSONAL INFORMATION

Name :Rajiv Gandhi.R

Father's Name :D.Rajkumar

Sex :Male

Marital Status :Married

DOB :03/02/1988

Nationality :INDIAN

Permanent Address :No:33,
Vanatherayan Palayam Street,

Landmark : Near krishna Vidhya
Mandhir higher secondary school ,
Tiruvannamalai – 606601.

Passport No & Expiry Year :U7877933 &
17/09/2030.

PROJECTS

7.TQVerse - Accenture Vendor

Technologies - C#.NET, WebApi, Angular14, HTML5, MS SQL, Microsoft Azure PaaS

Designation - Packaged Development Associate Manager

Lead the effort to ensure that architecture decisions as part of TQVerse initiatives are implemented consistently to support the candidates for trainings, Assessment & Jobs. Also was part of analyze, design, propose, and deliver End-End solutions in collaboration with the functional architects & development. TQverse helps underprivileged undergrads, diploma and non-tech graduates to up-skill through our learning paths, assess their skills and unlock tech jobs.

Roles & Responsibilities

- Lead enterprise development efforts, utilizing cross-functional knowledge (strategy, change management and business process management).
- Lead effort to identify and analyze enterprise business drivers to derive enterprise business, information, technical, and solution architecture requirements.
- Lead effort to ensure that enterprise architecture standards, policies, and procedures are enacted uniformly across application development projects and programs.
- Review the deliverables throughout the development cycle to ensure quality and traceability to requirements and adherence to all quality management plans and standards.
- Lead effort to review and provide input on proposals from an architectural perspective, including feasibility, practicality, technical viability, and consistency.
- I have involved & worked in various development activities such as Azure B2C Integration, Azure SQL, Azure key Vault, Azure Front Door Service, Azure Storage, Azure Function, Azure WebApp, Azure Monitor, Redis Cache, Learning Integration, DigiClass & HirePro Integration.
- TQVerse app will be managing & generating the own token by using Azure App registration.

6.Living Systems - Accenture Vendor

Technologies - C#, Angular14, HTML5, MS SQL, Microsoft Azure PaaS & DevOps

Designation - Packaged Development Associate Manager

Lead the effort to ensure that architecture decisions as part of Living System transformation initiatives are implemented consistently to support the business and IT strategy. Also was part of analyze, design, propose, and deliver architecture solutions in collaboration with the functional architects. Living systems assessment framework helps the client to assess their position against a maturity level and benchmark against the industry.

Roles & Responsibilities

- Lead enterprise architectural & development efforts, utilizing cross-functional knowledge (strategy, change management and business process management). Lead effort to identify and analyze enterprise business drivers to derive enterprise business, information, technical, and solution
- architecture requirements.
 - Lead effort to ensure that enterprise architecture standards, policies, and procedures are enacted uniformly across application development projects and programs.
 - Review the deliverables throughout the development cycle to ensure quality and traceability to requirements and adherence to all quality management plans and standards.
 - Lead effort to review and provide input on proposals from an architectural perspective, including feasibility, practicality, technical viability, and consistency. Lead effort to support lines of business, support staff and technology areas who are implementing projects that impact the architecture.

5.Abacus Recruitment Manager - Accenture Internal Project

Designation - Team Lead; Technologies - C#, ASP.NET, WebApi, Angular12, HTML, Postgre SQL, Microsoft DevOps, HirePro AWS Elastic Search, VB.NET

Abacus Recruitment is a product of Accenture under Talent supply chain domain where recruitment processes in Accenture is handled from Sourcing & Screening the candidates, Interview initiation process till offer rollout with the help of many ASP.Net web applications and With vendor integration for parsing the candidate documents & BGC verification.

Roles & Responsibilities

Worked and delivered the product in Agile methodologies & also Worked on CQRS design pattern and introduced AWS Elastic search. Created and developed a Bulk Offer letter UI with angular 8 & also Created stored procedures & LINQ for RM Candidate & Bulk Offer Letter modules.

- Implemented the Azure DevOps CI/CD. Managed the Deployment, Infra support & documentation activities.
- Mentored the team members to exercise exemplary development practices including design specifications, coding standards, unit testing and code reviews.
- Effectively managed cross-functional teams of developers, business analysts, quality analysts & clients.

4.Automation Opportunity Finder - Accenture Vendor

Designation - Team Lead; Technologies - C#, ASP.NET, WebApi, Angular12, HTML, Postgre SQL, Microsoft DevOps

Automation Opportunity Finder (AOF) is an Automation Assessment lever that has been deployed at scale across the organization. This asset helps delivery engagements to self-drive and identify maximum Automation and Optimization opportunities by comprehending the current process maturity score, automation maturity score and Automation maturity level. The assessment is based on Lean IT principles, Time & Motion study principles and Service Management best practices as prescribed in ITIL standards and is available for all delivery types namely AM, AD, Testing, Agile, DevOps

Roles & Responsibilities

- Played as a Scrum Master & Lead Role.
Individually contributed the Integration Services AOF-MAS, AOF-AP, AOF-AJ & AOF-FDS and developed the assessment & report UI with angular7.
- Introduced on Redis cache for tuning the application performance. Performed the data migration for AOF-FDS. Created stored procedures & LINQ for Assessment Score logics & Reports.
- Implemented Azure DevOps CI/CD & AD.
Mentored the team members to exercise exemplary development practices including design specifications, coding standards, unit testing and code reviews. Daily & Weekly status, Problem & Risk management, Requirement changes is reporting to the management people on time.
- Effectively managed cross-functional teams of developers, business analysts, quality analysts & clients.

3. GIS(GEO Information System) - Singtel Client

Designation - Senior Software Developer; Technologies - SharePoint, Asp.NetMVC, C#.NET, Oracle 10g, HTML

GIS is a web application in which various workflow of the network activities are managed. It is a workflow system used to govern the sequence of network project events. The business purpose of the GIS is to create the new project and approve that various stages involving different workflow. This application is used primarily by 2 users Singtel and Assetco. Process workflow management system (PWMS) is the project physical work tracking system. This system helps operation team to manage the process of copper cable pulling cable work and recovery.

Roles & Responsibilities

- Worked as a full stack developer. Created and developed the master UI screens and Core modules - Costing, Budget, WMS.
- Created stored procedures for Costing, Budget & Reports modules. Developed webparts in sharepoint and Provided the estimation of user stories to my supervisor and management people.
- Extensive experience in working with clients to define the requirements & UI design. Mentored the team members and provided my technical assistance to team.
- Managed the requirements analysis, new design, enhancements, production support & documentation work. Integrated the code & checked in TFS and resolving the defects and delivered on time.
- Followed the code standards and review of the work done by the team members.

2. Data Tracks (XBRL Services for US) - Taurus Quest Client

Designation - Software Developer ; Technologies - Silverlight 4.0, C#, WCF-RIA Services, LINQ, SQL Server, HTML

Extensible Business Reporting Language (XBRL) is an iXBRL-based markup language for electronic transmission of business and financial data in US using USGAAP Taxonomy Released by Securities & Exchange Commission (SEC), U.S.A. The finance specialists can create the Financial reports of companies apply the EDGAR Rules. They can map Taxonomies to data in financial statements and generate reports in Excel, PDF, ASCII format and output in iXBRL format (In-Line XBRL Format) pre-defined as prescribed by XBRL. The iXBRL output file will be validated in SEC Viewers.

Roles & Responsibilities

- Created the Master UI and developed all Master Screens. Creation of Workspace. Applied Edgar rule using regular expressions.
- Created online editor using java script. Created Excel sheet using 3rd party grape city spread sheet.
- Created a report generation. Involved Deployment, Code Quality and Documentation activities. Code/Quality review according to best practices and standards and checked in SVN.

1. Debit Recon & OneRecon - Citi Bank Client

Designation - Software Developer; Technologies - C#.Net, ASP.NET MVC, WebApi, SQL Server, HTML

This application shows reconciliation of the debit card transactions. The Reconciliation process between association files, CBS files & MNCs bank switch files. Totally the closing balance in each of the files created in ICC & ICT File against closing balance provided for the day. Total of USD amount & total of INR amount for the day needs to be computed. This dummy rate needs to be stored in a table & used to compute the INR amount for the days transactions & populated in an INR amount filed in both ICC & ICT Transactions

Roles & Responsibilities

- Created and developed Master, Reconciliation and Report Screen.
- Involved design of the application and created stored procedures.
- Generated the Exceptions Report, Aged Transactions Reports, and Matching of aged transactions on a daily basis.
- Followed the code standards and checked in code in SVN.
- Individually managed end to end product maintenance and enhancements.
